## How to Score the Rand SF-36 Questionnaire

STEP 1: SCORING OUESTIONS:

| QUESTION NUMBER | ORIGINAL RESPONSE | RECORDED VALUE |
| :---: | :---: | :---: |
| 1, 2, 20, 22, 34, 36 | 1 | 100 |
|  | 2 | 75 |
|  | 3 | 50 |
|  | 4 | 25 |
|  | 5 | 0 |
| 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 | 1 | 0 |
|  | 2 | 50 |
|  | 3 | 100 |
| 13, 14, 15, 16, 17, 18, 19 | 1 | 0 |
|  | 2 | 100 |
| 21, 23, 26, 27, 30 | 1 | 100 |
|  | 2 | 80 |
|  | 3 | 60 |
|  | 4 | 40 |
|  | 5 | 20 |
|  | 6 | 0 |
| 24, 25, 28, 29, 31 | 1 | 0 |
|  | 2 | 20 |
|  | 3 | 40 |
|  | 4 | 60 |
|  | 5 | 80 |
|  | 6 | 100 |
| 32, 33, 35 | 1 | 0 |
|  | 2 | 25 |
|  | 3 | 50 |
|  | 4 | 75 |
|  | 5 | 100 |

## STEP 2: AVERAGING ITEMS TO FORM 8 SCALES:

| SCALE | NUMBER <br> OF ITEMS | AFTER RECORDING AS PER <br> TABLE 1, AVERAGE <br> THE FOLLOWING ITEMS |
| :--- | :---: | :--- |
| Physical functioning | 10 | $3,4,5,6,7,8,9,10,11,12$ |
| Role limitations due to <br> physical health | 4 | $13,14,15,16$ |
| Role limitations due to <br> emotional problems | 3 | $17,18,19$ |
| Energy/ fatigue | 4 | $23,27,29,31$ |
| Emotional well being | 5 | $24,25,26,28,30$ |
| Social functioning | 2 | 20,32 |
| Pain | 2 | 21,22 |
| General health | 5 | $1,33,34,35,36$ |

## STEP 3: FIGURING SCORES

RAND recommends the following straightforward approach to scoring the RAND 36-Item Health Survey.
All questions are scored on a scale from 0 to 100, with 100 representing the highest level of functioning possible. Aggregate scores are compiled as a percentage of the total points possible, using the RAND scoring table (STEP I chart).

The scores from those questions that address each specific area of functional health status (STEP II chart) are then averaged together, for a final score within each of the 8 dimensions measured. (eg pain, physical functioning etc.)

For example, to measure the patients energy/fatigue level, add the scores from questions $23,27,29$, and 31 . If a patient circled 4 on 23,3 on 27,3 on 29 and left 31 blank, use table 1 to score them.

An answer of 4 to Q23 is scored as 40,3 to Q27 is scored as 60 , and 3 to Q29 is scored as 40 . Q31 is omitted. The score for this block is $40+60+40=140$. Now we divide by the 3 answered questions to get a total of 46.7 . Since a score of 100 represents high energy with no fatigue, the lower score of $46.7 \%$ suggests the patient is experiencing a loss of energy and is experiencing some fatigue.

All 8 categories are scored in the same way. Using this questionnaire at the beginning and during the course of care, we can track the progress of the 8 parameters mentioned in the STEP II chart. Pretty nifty, eh?
